Jacque ~

The below email is from Scott John of the Army Corps of Engineers. It provides additional information and clarification regarding the elimination of Borrow Site B as a possible disposal site for their project.

Please provide as a last minute agenda item.

Subject: RE: Latest sand dredge

Greg -

Borrow site B has been eliminated as an option as a disposal site for the San Diego Harbor dredging project because of its depth. The EPA regulates all open ocean disposal activities and because they do not want clean, beach compatible sand being dumped into the ocean when it could be used for beach nourishment they did not allow us to utilize this borrow site. If the IB Shoreline Protection Project had funding we would have been able to use it as a temporary storage site for later use in beach replenishment activities, but because this is not the case would could not use this option.

Hope this helps, let me know if you need more,

Scott
